Experiment-16

Sum of integers

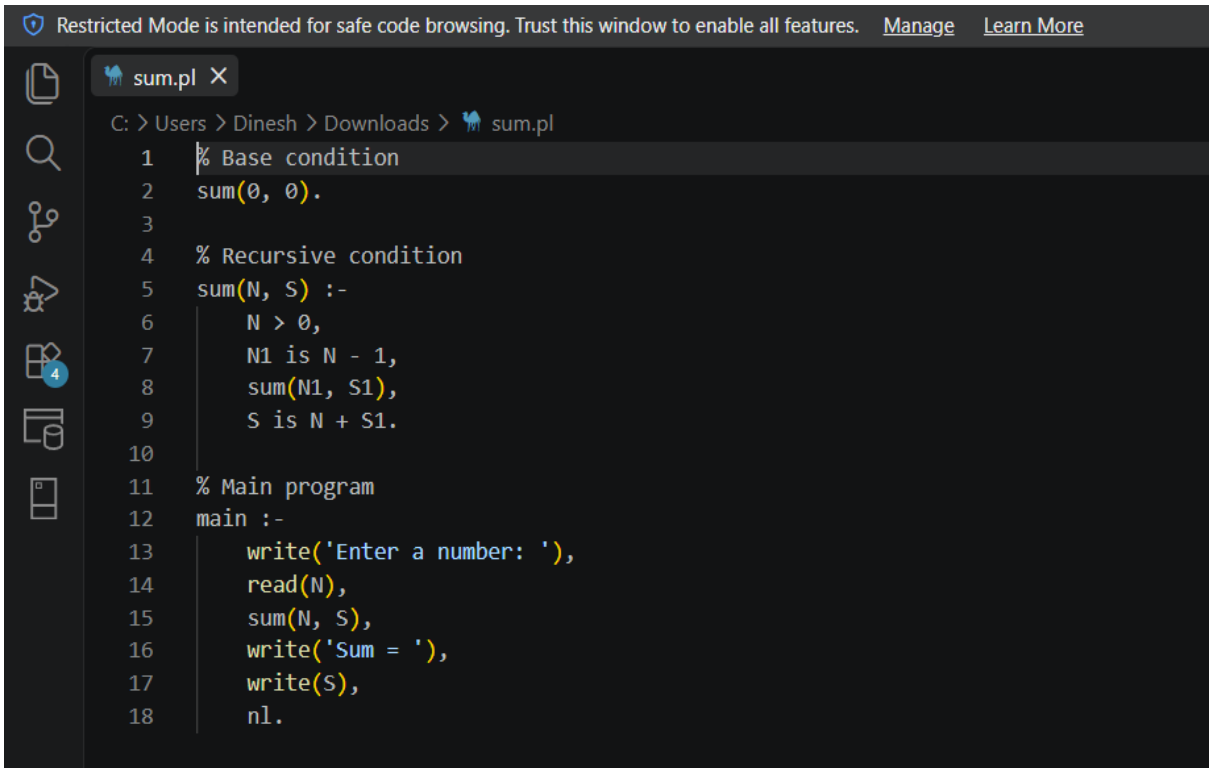

Aim

To write and execute a Prolog program to calculate the sum of integers from 1 to N.

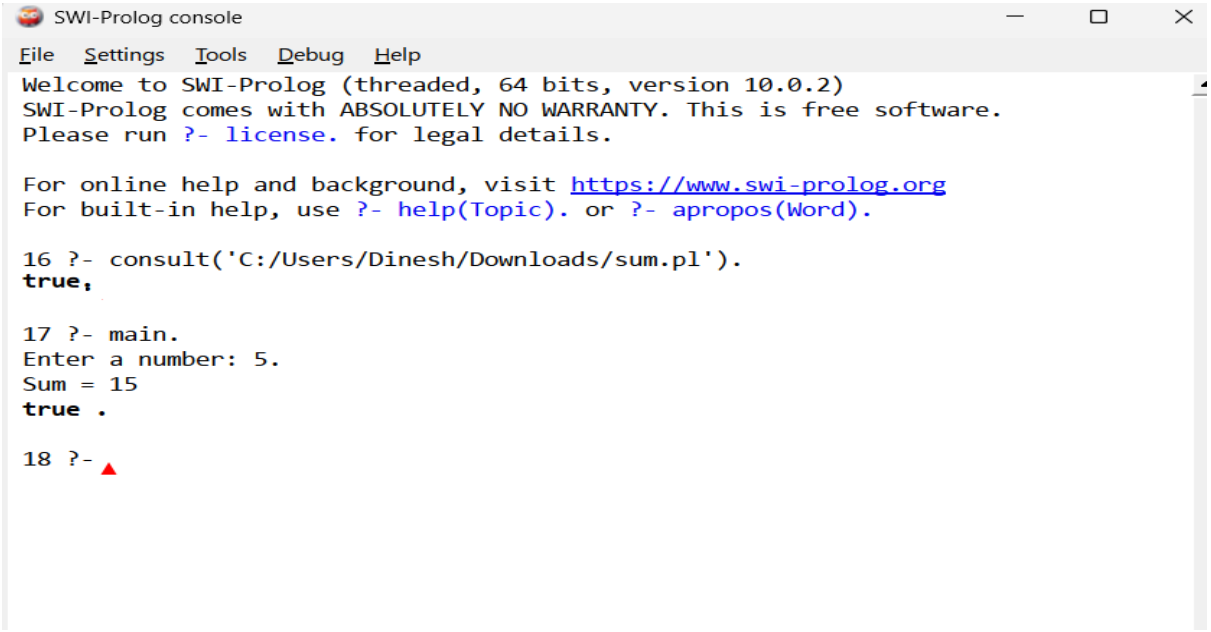

Procedure

1. Open SWI-Prolog on the computer.
2. Open Notepad and type the Prolog program.
3. Save the program as sum.pl on the Desktop.
4. Open the SWI-Prolog console.
5. Load the program using the consult command.
6. Press Enter to load the program.
7. Type main. to execute the program.
8. Enter the required integer, for example, 5.
9. The program calculates the sum using recursion.
10. Display the final sum.

Implementation

Output

Result

The Prolog program was successfully executed, and the sum of integers from 1 to 5 was calculated as 15.
